

Cleaners

ACID CLEANER

Concentrated acid-based detergent for after-setting cleaning

ACID CLEANER is a concentrated acid-based cleaner specifically for the post-installation cleaning of floors and surfaces where a cement-based grout has been used. The action of **ACID CLEANER** eliminates all residues of glue, grout, and varnish, without changing the color of joints and restoring the original appearance of treated surfaces.

ACID CLEANER is a product that can be applied to all acid-resistant materials which need washing at the end of the installation process.

BENEFITS

- ✓ Concentrated formula
- ✓ Effective on cement-based grout residues
- ✓ High cleaning power
- ✓ Great de-scaling action

USES

Suitable for indoor and outdoor applications.

Suitable for Bricks, Terracotta, porcelain tiles, granite, clinker, porphyry, quartz agglomerates, and natural stones that are not sensitive to acids.

COVERAGE

10/15 m²/l

APPLICATION EQUIPMENT

White Pad, Single disk machine

APPLICATION STEPS

Before applying the product it is necessary taking a preliminary test to evaluate the suitability of the product on an unexposed area or unused piece of material Surface Preparation

- Before proceeding with the cleaning, it is advisable to clean away any surface residues, such as dust, debris and coarse dirt, using a broom or a vacuum cleaner.
- Wait for the surface to be treated to be completely dry.
- Any surfaces close by not to be treated with the product must be protected.
- Apply the product to surfaces with a temperature between +5 and +40°C

Application

- Dilute the product in clean water. Pour 1 part product into 2 or 3 parts water, according to the amount and the stubbornness of residues to be removed.
- Begin to work the product on the surface, rubbing the surface with the tool of your choice.
- Leave the product to act for 5 10 minutes, while working the product every now and then to boost and aid the cleansing action of the product.
- Once the time has passed, remove all residues and rinse the whole floor with plenty of water. If the result is only partially achieved, repeat the application process following the same steps and if necessary, slightly increase the concentration of the product in water.

Resume Surface Use

After carefully removing any residues and rinsing the surface with water, the floor can be opened to foot traffic.

SHOWROOM LINE

COMPLEMENTARY MAINTENANCE PRODUCTS After cleaning with **ACID CLEANER** we recommend using the most suitable Faber cleaner, such as **NEUTRAL CLEANER** or **FLOOR CLEANER**, depending on the nature of the surface.

INSTRUCTIONS AND GUIDELINES

- Do not apply the product on wet or heated surfaces
- When applying to recently laid or grouted surfaces, wait at least 2 days for the adhesive or grout to cure completely.
- Do not use in combination with other chemicals
- Before applying the product it is necessary to take a preliminary test to evaluate its suitability
- Do not apply on acid-sensitive materials

EQUIPMENT CLEANING

The equipment used can be cleaned with water

PHYSICAL AND TECHNICAL DATA

Formula	Clear Liquid
Color	Orangy
Odor	Almond
pH	$1,5 \pm 0,5$
Specific gravity at 20°C	$1100 \pm 20 \text{ g/l}$

STORAGE Keep the container tightly closed and store in a cool, dry place.

SHELF LIFE 36 months in the original, sealed packaging, stored in a cool, dry place.

PACKAGING 1 I bottles - 12 bottles per box

5 I bottles - 4 bottles per box

ACCIDENTAL

SPILLS

Soak up the product with an absorbent material (paper towels, sawdust, vermiculite, etc.) and dispose of it in the most suitable waste container.

SAFETY When applying the product, always use suitable personal protective equipment

and follow the instructions on the product safety data sheet with care.
