

#### Cleaners

## **TILE CLEANER GEL**

## Slightly acidic gel cleaner for the removal of organic and inorganic residues

TILE CLEANER GEL is a slightly acidic, water-based cleaner for deep cleaning of organic and inorganic dirt. The special formula allows the product to penetrate inside the pores and textures of the material.

TILE CLEANER GEL is also recommended for the removal of metal marks. The product is suitable for surfaces that are acid-resistant.

#### **BENEFITS**

- Ready to use
- ✓ Effective against surface patina
- ✓ High cleaning power
- ✓ Great for vertical application
- ✓ Effective against metal marks

#### **USES**

Suitable for indoor and outdoor applications.

**Suitable** for Slate, Sandstone, Basaltina - Lava stone, Molten basalt, Glazed ceramics, Clinker, Cotto, Granite, Polished porcelain tiles, Natural porcelain tiles, Textured porcelain tiles, Reconstituted stone (Eco stone), Porphyry, Quarzite, Terracotta, Tuff

### **COVERAGE**

10/15 m<sup>2</sup>/l

# APPLICATION EQUIPMENT

White Pad, Single disk machine

# APPLICATION STEPS

Before applying the product it is necessary to take a preliminary test to evaluate the suitability of the product on an unexposed area or unused piece of material Surface Preparation

- Before proceeding with the cleaning, it is advisable to clean away any surface residues, such as dust, debris, and coarse dirt, using a broom or a vacuum cleaner.
- Protect any surface close by that is not meant to be treated.
- Apply the product to a dry surface with a temperature between +5 e +40°C
- Wait at least 2 days after the installation for the grouting to cure completely Application
- The product is ready to use.
- Pour the solution on the surface you would like to clean. If it's a vertical surface, the thickness of the formula will help it stay in place.
- Start working the product using the preferred tool.
- Let it act for about 10 to 20 working it every now and then to boost iits extractive action. In case of a vertical application make sure the product is continuously wetting the surface.
- Once the time has passed, remove all residues and rinse the whole floor with plenty of water. If the result is only partially achieved, repeat the application process following the same steps and if necessary, slightly increase the concentration of the product in water.

### Resume Surface Use

After carefully removing any residues and rinsing the surface with water, the floor can be opened to foot traffic.
