

Honing and Polishing

TILE CREAM

Water-based cream to restore the shine on marble, porcelain stoneware and ceramics.

TILE CREAM is a water-based cream that has an ultra-fine abrasive surface effect that will restore flaws on surfaces or on the glaze on materials, such as slight scuffs, small scratches, matt areas and discolouring, or to remove surface treatments and finishes without adversely affecting the original look of the material. **TILE CREAM** also provides a good surface seal that will increase resistance to dirt and foot traffic in case of easily soiled surfaces.

If used on **polished quartz or full body polished porcelain stoneware**, **TILE CREAM** can even out the appearance of the material if it is worn through foot traffic, and it is also able to restore scratches and scuffs. It can also be used to prepare surfaces for a wider polishing intervention with more specific polishes, since it can replace a light mechanical polishing intervention.

If used on **porcelain ceramic surfaces, even if lapped**, **TILE CREAM** can restore the original appearance of the material when this, due to wear and foot traffic, has lost part of its shine and become scratched. In this case, **TILE CREAM** also helps to restore the original colour of surfaces and also boost shine.

When used on **ceramic flooring or on porcelain or textured stoneware**, **TILE CREAM** can boost the shine and dirt-resistant performance of the material. **TILE CREAM** can also be used with success to soften the excessively rough surfaces of textured material, meaning that the amount of dirt trapped on the flooring is reduced.

CHARACTERISTICS AND BENEFITS

- ✓ Restores the original appearance of the material without spoiling the surface
- ✓ **Quick and easy** application
- ✓ **Even** looking **finished results**
- ✓ **Sealing action** on material **porousness**
- ✓ **Limits the possibility of dirt build up** on the material
- ✓ **Makes the cleaning** of treated surfaces **simpler** and more **effective**
- ✓ **Water-based** product.
- ✓ **No defects through overlapping**

USES

This product **can be used** on both indoor and outdoor surfaces.

This product is **suitable** for use on: glazed ceramics, natural porcelain stoneware, polished porcelain stoneware, lapped porcelain stoneware, textured porcelain stoneware, and quartz-resin agglomerate.

TILE CREAM

Water-based cream to restore the shine on marble, porcelain stoneware and ceramics.

COVERAGE

40/50 m²/kg

APPLICATION EQUIPMENT

Single disc machine with at least 1.5 HP; manual rotary brush.

Faber Chimica is able to supply the WARRIOR single disc machine, which has a power of 2.2 HP, and is optimised for the correct application of any product.

APPLICATION STEPS

Preparing and cleaning the surface

1. Carefully clean the surface, making sure to remove any dust or dirt present.
2. The product can be applied across the whole area to be treated. To make treatment easier, however, we recommend in any case that sections of 2 m² are treated at a time
3. Never apply TILE CREAM to wet surfaces. TILE CREAM can be used on slightly damp surfaces; therefore, please ensure that the surface to be treated is as dry as possible.
4. Apply TILE CREAM to surfaces with a temperature of between +5 and +40°C
5. Any adjacent surfaces not being treated with the product must be protected.

Application

6. Shake the bottle well before used and pour 2/3 spoons of product onto the surface to be treated. This amount is sufficient to treat a surface area of about 2 m².
7. Add a small amount of water to the cream. As a rough guide, each spoonful of product requires around 1 spoon of water.
8. As soon as the water has been added to the cream, proceed to apply it to the surface using the single disc machine, fitted with white pad and set to between 150 and 200 r.p.m. Continue with the single disc machine, taking care to cover the whole surface area evenly with the cream. Try to pass over each section of floor the same number of times.
9. During the application process, the mix must maintain its creamy consistency and therefore, if it should become too dry, gradually add a little water.
10. Continue to pass over the surface with the polisher until the result is as required. This is easy to check during application by removing a small area of product using a squeegee mop or similar, and checking the surface finish.
11. Once the required result has been achieved, vacuum or remove any residues from the surface and rinse with plenty of clean water.

Generally, **TILE CREAM** will restore surface shine, restoring any scratches and discolouration within 15-25 passages, independently of the type of surface.

LINEA
PROFESSIONALE

Honing and Polishing

TILE CREAM

Water-based cream to restore the shine on marble, porcelain stoneware and ceramics.

Drying time

12. After carefully removing any residues and rinsing the surface with water, no further waiting time is necessary.

Opening to floor traffic

13. After carefully removing any residues and rinsing the surface with water, the floor can be opened for use.

COMPLEMENTARY CLEANING AND MAINTENANCE PRODUCTS

- For *routine cleaning* of a surface treated with TILE CREAM, we recommend: ALGAFLOOR

- For *extraordinary cleaning* of a surface treated with TILE CREAM, we recommend: FABER 30 or DETERFUG, according to the type of dirt.

INSTRUCTIONS AND GUIDELINES

- Do not allow the product to dry during the application process. Frequently check consistency and add water as needed to return the the product to its creamy state.
- Never apply the product to a wet surface
- Do not apply the product to overly heated surfaces
- Apply the product to surfaces with a temperature of between +5 and +40°C
- When applying to recently laid or grouted surfaces, wait for the adhesive or grout to cure completely.
- Before applying the product to the whole surface, it is advisable to test a small, unexposed area or unused piece to check its suitability for use.

EQUIPMENT CLEANING

At the end of application, the equipment used can be washed using water.

SAFETY

When applying the product, always use suitable personal protective equipment and follow the instructions on the product safety data sheet with care.

PHYSICAL AND TECHNICAL INFORMATION

| | |
|--------------------------|-----------|
| Aspect: | Cream |
| Colour: | Bianco |
| Odour: | Inodore |
| pH: | 7,5 ± 0,5 |
| Specific Gravity at 20°C | N.D. |

STORAGE

Keep the container tightly closed and store in a cool, dry place.

SHELF LIFE

36 months in the original, sealed packaging, stored in a cool, dry place.

PACKAGING

- 5 kg bottle – 4 bottles per box

TILE CREAM

Water-based cream to restore the shine on marble, porcelain stoneware and ceramics.
